CENTENARY OF JULIA WARD HOWE

The centenary of Julia Ward Howe, author of "The Battle Hymn of the Republic," is of particular interest to the members of the Institute because of the very active part that has been taken in the affairs of the Institute by her son, Dr. H. M. Howe.

By an order of the Board of Education, the one hundredth anniversary of Mrs. Howe's birth, May 27, was observed in the public schools of New York City with the singing of the famous battle hymn.

Boston, the city of her adoption, celebrated her centenary by a service in the Church of the Disciples, where Governor Coolidge made an address, and in which John Andrew Post took a prominent part. General Pershing sent a letter, which was read by the Rev. Abraham Mitrie Rihbany, in which he said:

"It is a great privilege to bear witness to the widespread effect of 'The Battle Hymn of the Republic' on the morale of the fighting men. It is unique in its religious fervor and enthusiasm and whenever sung it can have but the same effect which it produced when it was first sung in the Civil War."

Mrs. Howe lived in her home near the Battery, New York City, until she was a half-grown girl, when her father, following the march of the city northward, built a house on Bond street and Broadway, which at that time was considered a great piece of folly, as his friends said that he was going "out of town." "The Battle Hymn of the Republic" was inspired by a visit paid by the author to the Army of the Potomac during the Civil War. It was first sung in Washington by Dr. McCabe, the famous "fighting parson." The first time Abraham Lincoln heard him sing the stirring hymn his eyes filled with tears, and he exclaimed: "That is a good song; sing it again."
